WAFIY AIYMAN BIN MOHD RADZI

Seremban, Negeri Sembilan, Malaysia | wafiyaiyman9@gmail.com

PROFESSIONAL SUMMARY

Fresh graduate with a Bachelor of Information Science (Hons.) in Information Systems Management from UiTM. Hands-on experience in HRIS, systems analysis, full-stack web development, data analytics, and process automation. Skilled in HTML, CSS, JavaScript, PHP, MySQL, PostgreSQL, Supabase, Excel/VBA, and Looker Studio. Developed automated systems and data-driven solutions to improve operational efficiency, with proven leadership experience managing a 135-member student organisation. Strong in problem-solving, adaptability, and translating business requirements into practical IT solutions.

CORE SKILLS

Programming & Web: HTML, CSS, JavaScript, PHP, CakePHP, C++

Database: MySQL, PostgreSQL, Supabase, phpMyAdmin

Dev Environment & Tools: Laragon, Apache, Composer, Git

Analytics & Automation: Excel (VBA, XLOOKUP, Pivot Tables), Looker Studio, Tableau, SAS

Design & Prototyping: Figma (Web & Mobile UI/UX), Canva, PowerPoint (interactive posters and video)

Languages: Malay (Fluent), English (Fluent)

WORK EXPERIENCE

Segi Value Holdings Sdn. Bhd. (Segi Fresh)

March 2026 – August 2026

HRIS / People Analytics Intern, Group Human Resources

- **Built and deployed** a responsive web application (HTML, CSS, JavaScript) that generates English and Bahasa Malaysia resignation acceptance letters directly from exported Excel data, **cutting document dispatch time from hours to seconds**.
- **Engineered** short-notice and full-notice rule logic, multi-template selection, reference-number tracking, PDF generation, and automated email preparation into the letter-generation system.
- **Automated** statutory (JTK) compliance documentation for **200+ retail outlets** using Excel, Word Mail Merge, XLOOKUP, and VBA, **reducing per-outlet preparation time from ~10 minutes to under 3 minutes**.
- **Designed and built** a multi-page Looker Studio dashboard connected to Google Sheets, consolidating **7 HR modules** (leave, claims, attendance, payroll, document tracking, employee evaluation, employee profiles) into a single reporting view.
- **Developed** Excel/VBA calculation tools for annual leave, short-notice deductions, medical leave, payroll variance, and resignation date cut-offs, standardizing calculations across the HR team.
- **Maintained** employee records and provisioned new-joiner accounts in RYMNET, ensuring accurate onboarding and day-to-day HRIS data integrity.
- **Cleaned and validated** claims, salary, and workforce datasets; produced pivot-table analyses, mail-merge documents, and PDF outputs to support HR reporting.

PROJECT EXPERIENCE

AutoLetter System — Web-Based Letter Generation, Approval & Document Management Platform

Final Year Capstone Project (Solo) | HTML5, CSS3, JavaScript, Supabase, PostgreSQL

- **Designed and built** a full-stack correspondence platform with **3 role-based portals** (Staff, Department Admin, Super Admin), covering template authoring, Excel-driven letter generation, multi-step approvals, and organization-wide reporting.
- **Engineered** a dynamic Excel-to-template field-mapping system that lets any workbook's column headers map to template placeholders, removing the need for fixed spreadsheet formats across departments.
- **Built** a sequential multi-signer approval workflow with digital signature capture, snapshotting each signature at approval time to preserve an accurate audit trail.

- **Modeled and implemented** a normalized PostgreSQL schema of **17 relational tables** on Supabase with Row-Level Security and a database function to safely validate approval state transitions.
- **Delivered** the project using Agile methodology across **7 iterative cycles**, validated with **25 documented functional test cases** covering authentication, generation, approval, and role-parity scenarios.

Venue Booking System (UiTM)

Team-Based Academic Project | CakePHP, MySQL, phpMyAdmin

- **Developed** a CRUD-based venue booking system for UiTM using the CakePHP framework, with a MySQL database managed through phpMyAdmin.

Restaurant Reservation System & Record/Event Management System (REMS)

Team-Based Academic Projects | PHP, MySQL

- **Developed** two web applications — a restaurant table-booking system and a centralized university event-management system — covering user authentication, normalized database design, and administrative reporting controls.

Badminton Court Booking System

Individual Academic Assignment | HTML, JavaScript

- **Built and published** a front-end badminton court booking interface as an individual assignment, using HTML and JavaScript.

Systems Analysis Project (SDLC) & Freelance Learning Platform Prototype

Team-Based Project (DFD/Requirements Analysis) and Independent Freelance Work

- **Modeled** system requirements using Level 0/1 Data Flow Diagrams and authored a technical report on future web development directions.
- **Designed and built**, as freelance work, a prototype learning platform for a client, translating their course-delivery requirements into a working web prototype.

LEADERSHIP & ACHIEVEMENTS

President, Information Management Students Association (IMSA) *2024 – 2026*

- **Led** a committee of **135 members**, setting the association's strategic direction and serving as primary liaison between students and faculty management.
- **Directed** IMSAGET2GETHER (2024) as Program Director and served as Person-in-Charge for ISSNITE, MAJIS, SUPRO, and IMSAGET2GETHER (2025); selected as a UiTM Student Parliament participant (2024, 2025).
- **Recognized** with the Faculty Best Leadership Award, Best Leadership Award, and Best Student Award.

EDUCATION

Bachelor of Information Science (Hons.), Information Systems Management *2023 – 2026*

Universiti Teknologi MARA (UiTM) | CGPA: 3.45

Relevant Coursework: Systems Analysis & Design, Cybersecurity (Elective), Database Management, Information Systems Project (Capstone)

STPM (Sijil Tinggi Persekolahan Malaysia) *2021 – 2023*

Kolej Tingkatan Enam Tuanku Muhriz

Sijil Pelajaran Malaysia (SPM) *2020*

SMK Panchor
